## Parental control over cellphones:

The school is concerned about the content that the boys have access to via their cellphones. In order to assist the school, parents can now follow these steps in order to control this content:

Vodacom:

- All Contract and Prepaid customers can bar access to adult content on a Vodacom cellphone by dialing \*111\*123# from the cellphone concerned.
- To unblock the adult content restriction, visit your nearest service provider and provide your ID to prove that you are at least 18 years old.
- Unblocking of adult content cannot be done telephonically through Customer Care.

MTN:

How to sign up

1. Dial \*101# from the handset you would like to restrict content on
2. Select the content category to be barred
3. Create a PIN (this number will allow you to alter the filter settings or remove it entirely at a later stage)
4. Input your cellphone number to receive updates on the filter's settings
5. Input your chosen PIN

How to maintain MTN Parental Control

1. To change details, dial \*101#

If there are any changes to the settings, both you and the cellphone with restricted access will receive an SMS

## CELL C & Telkom Mobile:

Telkom Mobile & Cell C, however, does not have a technical solution to assist parents in protecting their children from access to adult or other mobile content.

## Ouer beheer oor selfone:

Die skool is bekommerd oor die seuns se gebruik van selfone en veral oor die tipe materiaal waaroor seuns toegang het. Ouers kan nou die skool ondersteun deur effektiewe toegangsbeheer oor hul seuns se selfone toe te pas. Die volgende stappe kan gevolg word:

### Vodacom:

- Alle kontrak- en Prepaid-kliënte kan toegangsbeheer oor volwasse inhoud uitoefen deur \*111\*123# vanaf die betrokke selfoon te skakel.
- Ten einde die toegangsbeheer op te hef, moet die naaste kliëntediens sentrum besoek word met 'n ID-dokument om te wys dat die persoon bo 18 jaar oud is. Dit kan nie telefonies opgehef word nie.

### MTN:

- Skakel \*101# vanaf die handstuk waaroor beheer uitgeoefen wil word.
- Kies die areas wat beheer wil word.
- Skep 'n PIN-nommer wat later gebruik kan word om die toegangsbeheer te kanselleer.
- Voorsien u eie selfoonnommer ten einde opdaterings te ontvang.
- Tik die gekose PIN-nommer in.
- Skakel \*101# ten einde inligting te verander.
- Enige verandering op bogenoemde besluit sal per SMS gekommunikeer word.

### CELL C & Telkom Mobile:

- Daar bestaan ongelukkig geen diens rakende ouerbeheer vir bogenoemde netwerke nie.
